

Timothy Rayner

Full Stack Software Engineer

Norwich, UK | tim.rayner2020@gmail.com | +44 7512 282997 | [Github](#) | [LinkedIn](#) | [Portfolio](#)

Personal Summary

Self motivated, senior full-stack software engineer with expertise in Next.js, PostgreSQL, AWS and TypeScript. I reliably led end to end development of [Artlist.io](#)'s new product: **The Artlist AI Toolkit**; now contributing to the company's £300m ARR. I'm currently looking for my next big project where I can contribute and scale with the business/client.

Skills

Node, TypeScript, JavaScript, Next.js, React, TanStack Query, React Native (Expo), tRPC, MSW, Remix.js, Vitest, Storybook, SQL server, PostgreSQL, Nest.js, Express, Microsoft SQL Server, Deno, Java, C#, SQLite, Prisma, Drizzle, NextAuth, GraphQL, Docker, Websockets, Redis, AWS, Azure, Vercel, Supabase, Snowflake, Cloudflare, CI/CD Pipelines, Localstack, Git, Claude Code, Cursor, Microservices, REST APIs

Experience

Artlist.io

Jan 2025 - June 2026

Full Stack Software Engineer

- **Tech stack:** React, Next.js, React Query, TypeScript, PHP (Laravel), SQL (PostgreSQL), distributed systems, AWS (IAM, Cognito, S3, SQS, Lambda), CI/CD pipelines.
- Planned, Built, and Scaled Artlist AI Toolkit - we saw 1 million users sign up in the first week.
- Increased loading time of Artlist Toolkit by 21% from a cold start, increasing user retention by ~10% (stats recorded and investigated using DataDog, Coralogix, and Argo).
- Built responsive, rich UI features as well as backend infrastructures for multiple projects, working within a team renowned internally as extremely resourceful, reliable, completer finisher developers end to end.

Mobilityways

Aug 2022 – Dec 2024

Frontend Software Engineer

- Stack: Vue 3, TypeScript, React Native, Razor, Handlebars.js, SQL, Cypress, Azure functions
- Increased test coverage ~20% each quarter through Cypress e2e tests and Vitest unit tests; significantly improving developer confidence, and reducing regression report cases.

Asprey Management Solutions

April 2022 – August 2022

Full Stack Software Engineer

- Pushed for unit and e2e testing on an existing code base with 0% test coverage - managed to leave my role covering 60% of all features with some kind of coverage.

Crisp Malt

October 2019 – April 2022

Full Stack Software Engineer

- Ported legacy systems to the cloud, moving ~30% of all on-prem data to Azure, with fully working microservices, and CI/CD pipelines.
- Built "ClockWatch" - a paperless fire alarm registering service; removing the risk of a human needing to re-enter the building to gather this data manually.

Projects of Note

[Structura Digital Construction](#) - QA and progress tracking software *October 2025 – Present*
In talks of acquisition with a large-scale construction company based in the UK.

[Servaa](#) - ML powered food waste and staff management tool.

Feb 2026 - Present
